🔍 What are HAR files?

The **HTTP Archive (HAR)** format records what network requests are made by the browser when accessing a website.

🔍 HAR request waterfall

A **network request waterfall** shows how long each network request took and when during the page load process it was made.

Open HAR file to inspect network request details

File size, response status, priority, and more

Click each request to expand it and view additional details.

HTTP request and response headers

View the HTTP request and response headers for each network request.

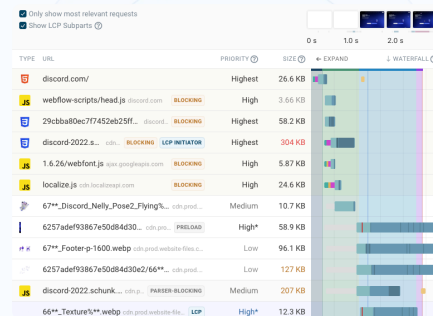

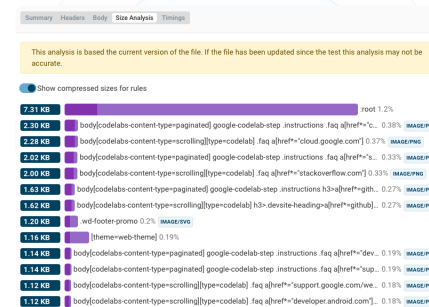

Check response bodies and size

View HTTP response bodies

See how the server responded to each browser request.

Optimize response size

Get a detailed size analysis for HTML and CSS responses to see what contributes to their download size.

Collect page speed data in a controlled environment

More detailed page speed data

HAR files just show basic info on network requests. But a full page speed test will tell you key performance metrics and a rendering filmstrip showing when content becomes visible.

Extra request details

See what requests are render-blocking, what resources are preloaded, and how different resources related to each other.
